CAREER OBJECTIVE

To obtain a challenging position as a Full Stack Java Developer where I can apply my proficiency in Java, Spring Boot, front-end technologies, and database management to develop robust, scalable, and user-oriented applications that drive organizational success.

PROJECTS

Title: Courier Service Management System. (Front-End & Back-End)

- Spring Boot
- Java
- Angular
- MySQL

Description: A full-featured Courier Service web application built with Angular and Spring Boot, enabling parcel booking, tracking, and delivery management. It supports hub-to-hub transfer, real-time parcel tracking, and secure payment confirmation. Designed to provide a fast, reliable, and user-friendly logistics experience for customers and employees.

Title: Courier Service Management System. (Front-End & Json Server)

- Angular
- Json Server
- JavaScript

Description: A dynamic Courier Service web application developed using Angular, JavaScript, and JSON Server for seamless parcel management. Features include parcel booking, tracking, and hub-to-hub transfer with real-time updates. Designed to deliver a fast, interactive, and user-friendly logistics experience for customers and employees.
